WWW.MAINEIAAI.COM

Speakers:

Richard Jones IAAI-CFI(V), IAAI-ECT, IAAI-CI:

Mr. Jones has over 23 years of experience in the field of investigations for both the public and the private sectors. He also has prior service and training with local fire districts and the Louisiana Office of State Fire Marshal, specializing in the field of fire and explosion investigations. Mr. Jones has completed numerous courses related to fire and explosion investigations sponsored by the National Fire Academy, Maine State Police, the International Association of Arson Investigators, and other federal, state, and local organizations.

He earned a degree in Fire Science from Columbia Southern University and is an experienced lecturer on fire and explosion investigations. Mr. Jones has been recognized as an expert witness and has provided testimony on both the state and federal levels.

Robert Toth IAAI-CFI, IAAI-CI:

A certified fire investigator with nearly 22 years in the fire service, the last 10 as part of law enforcement conducting fire investigations in both the public and private sector

Owner of IRIS Fire Investigations, Inc., assisting private industry and the legal community conducting origin and cause investigations in Colorado and other States in the western U.S. since 2002

Qualified expert on fire investigations, NFPA 921, interviewing, internet technology, report writing and digital photography training

Sought after speaker and lecturer across the United States, in Canada, Hong Kong, Malaysia, Botswana, and South Africa

Regular contributor to the Fire & Arson Investigator journal with his "Seen on Scene" articles

A past Director of the International Association of Arson Investigators (IAAI) and Past President of the Colorado Chapter of the (IAAI)

Program Information:

This presentation will take the investigator on a journey through some of the High-Tech, Low-Tech, and No-Tech solutions for fire scene investigation, excavation, documentation and courtroom presentations available to the fire investigator. Most, if not all of these ideas were developed, not out of fire science and investigations needs, but mostly in other unassociated industry. The presentation will highlight how these solutions for other industry were exploited for use in fire investigations. Most, if not all, of the ideas, tools, and technology were and continue to be personally used by the presenter. The goal of the presentation is not just to introduce you to these tools and techniques, but to more importantly to stimulate critical and creative thinking about what and how we currently conduct our investigations and the "product" we provide our clients.
